SUMMARY

Full-stack software developer with strong emphasis on backend systems and Python. Experienced in building production APIs, working with SQL databases, and deploying containerized services. Solid grasp of data structures and algorithms with active competitive programming background.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL

Backend: FastAPI, Flask, Express.js, RESTful API design

Frontend: React, Next.js, Vite, HTML/CSS

Databases: PostgreSQL, SQLAlchemy, MongoDB, Redis

Cloud/DevOps: Docker, Kubernetes (basic), AWS, GitHub Actions, Linux/Bash

AI/ML tooling: sentence-transformers, LLM API integration (OpenAI/Groq), pandas, scikit-learn

EXPERIENCE

Python Developer — Verdant Softworks, Pune (Jul 2023 – Present)

- Built and maintained FastAPI microservices powering an internal HR analytics tool used by 200+ employees
- Optimized PostgreSQL queries and added indexing, reducing average API response time by 45%
- Integrated an LLM-based document classification pipeline using Groq API with structured JSON output
- Collaborated in an Agile team of 6, running two-week sprints with code review via GitHub pull requests

Backend Development Intern — Skyloft Labs, Remote (Jan 2023 – Jun 2023)

- Developed authentication and authorization module (JWT + refresh tokens) for a SaaS product
- Wrote Alembic migrations and maintained schema versioning across 3 environments

PROJECTS

Resume Screening Engine (Python, FastAPI, Groq API)

- Built an ATS scoring tool that parses PDF/DOCX resumes and scores them against job descriptions using an LLM, returning structured skill-match breakdowns

E-commerce Backend (Django REST Framework, PostgreSQL, Stripe API)

- Implemented cart, checkout, and order management with background task processing via Celery

EDUCATION

B.Tech, Computer Science (Data Science) — College of Engineering, 2024, CGPA: 8.7/10

CERTIFICATIONS

Meta Backend Developer Professional Certificate
